

Find your perfect braces

Do you mind if your braces are obviously visible?

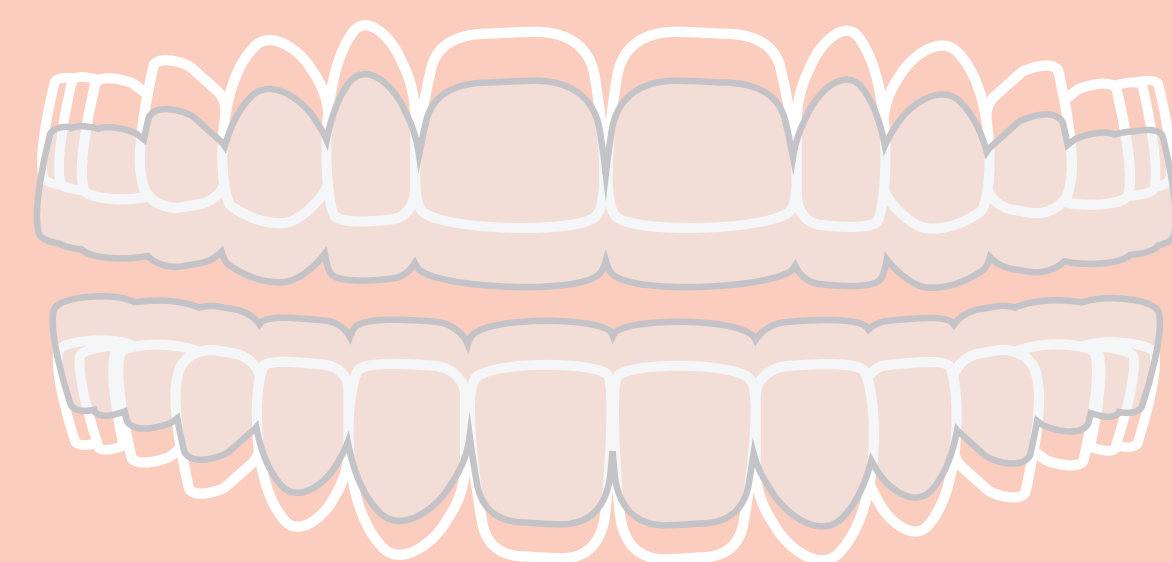

No

Classic braces Fixed metal braces

Classic Braces are fixed metal, they may not be discreet but with coloured elastics can help you to stand out and embrace your style. They can handle the most difficult cases for unparalleled precision and value.

Invisalign Clear removable aligners

The latest in clear aligner technology, Invisalign are custom-made and virtually invisible, and can be removed to eat, drink and brush your teeth!

Would you prefer a removable treatment?

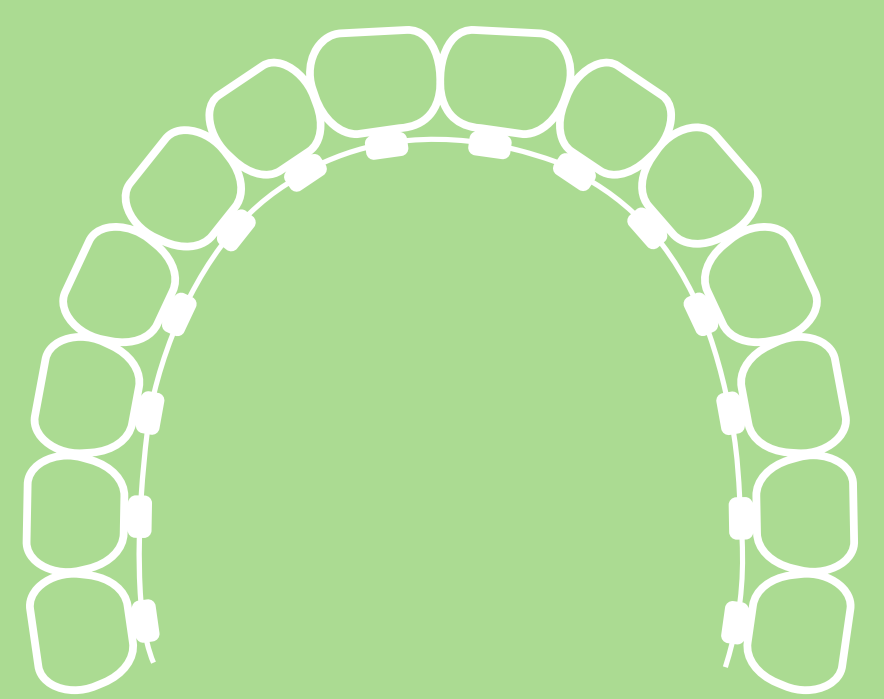

Removable treatments can be beneficial if you live a more active lifestyle, and they can help make maintaining oral hygiene easier.

I don't mind

Do you want a treatment that's completely hidden?

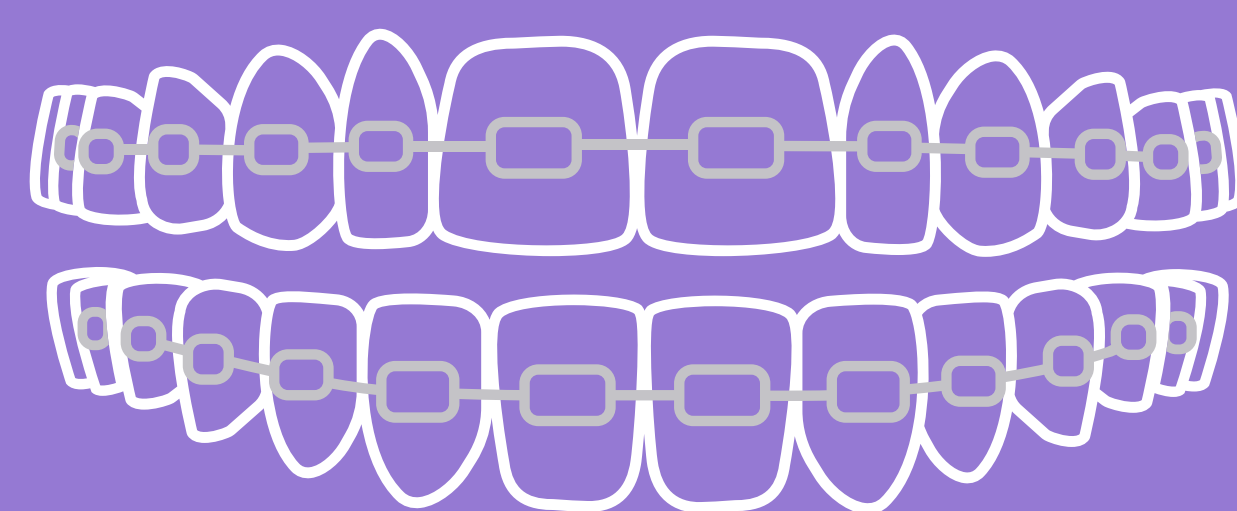

If you don't mind that your braces are fixed, there are a couple of further options depending on how visible you would like your braces to be.

Hidden braces Fixed lingual braces

Hidden fixed lingual braces are fitted to the backs of your teeth, so they're totally hidden from view. Even up close, they're almost impossible to spot, so they're perfect if you don't want your braces to be on show, but can be a more expensive treatment option.

Discreet braces Fixed ceramic braces

Discreet fixed ceramic braces are less visible than fixed metal braces, and can provide effective and faster results compared to removable treatments.

Did you know that some under 18s are eligible for free NHS orthodontic treatment?

Your Dentist will need to start the referral process. Then, we will assess your teeth to find out if you are eligible or not. If you are not eligible there are still private options available.
